

KINGDOM AQUAPONICS™
We grow plants naturally

Fuel for Your Compost Tea Operation Increasing Quality Instantly and Easily

K.A.'s ALLIANCE™ for compost tea is a concentrated fibrous matrix that increases the quality of your compost tea/extract brewing. Our unique process combines biologically concentrated material that is naturally stripped compost, fish by products, other plant fibers and trillions of beneficial microbials derived from specific humus. This product will instantly boost protozoa and fungi during the brewing/extraction process to levels that will radically increase nutrient cycling once applied to the land. Your finished custom product can also be made for specific needs such as brownfields and storm water management applications.

K.A.'s ALLIANCE™ for brewing is easy to use, cost effective and will increase the quality of your product instantly.

Nature's Connections

Sun provides the energy to the plant that helps create and release food sources back into the root zone.

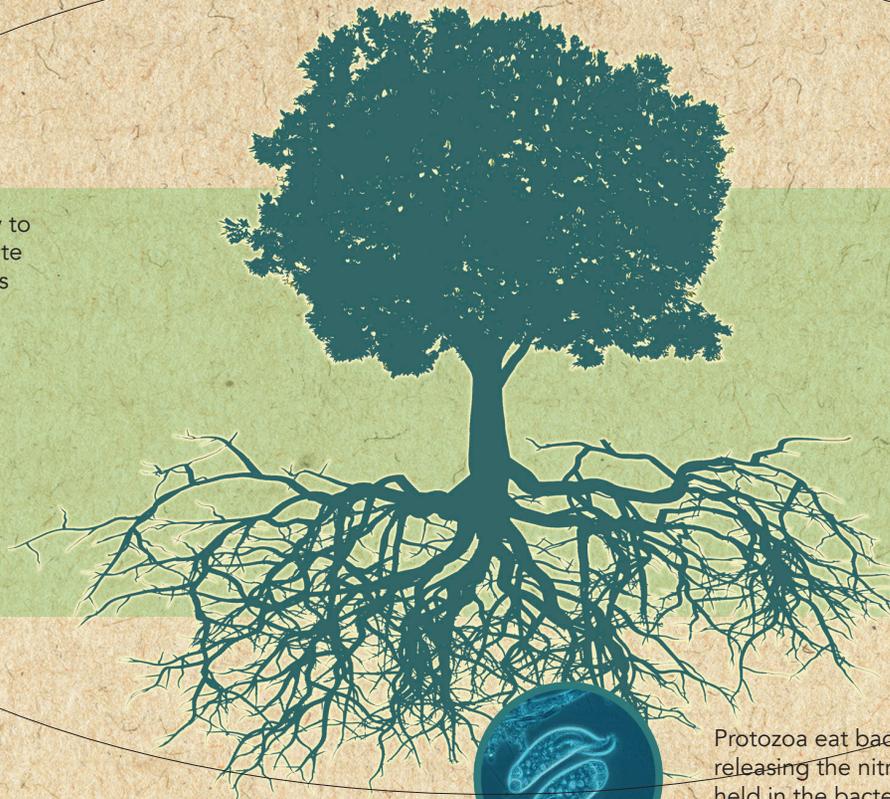

Reduction of water reduces disease opportunities and saves natural resources.

Fungi break down organic matter and connect soil particles together creating structure for water and oxygen to move through soil.

Bacteria consume organic matter and immobilizes nutrients in their biomass and the glues surrounding the bacteria bind soil particles together.

Protozoa eat bacteria releasing the nitrogen that was held in the bacteria making the nutrients naturally available for plant uptake.

info@kingdomaquaponicsllc.com

Kingdom Aquaponics™ is revolutionizing progressive organics with its first generation of BLIS™ (Balances Life Infusion System) products along with a new level of diagnostics, problem solving and cost effective state of the art solutions. Our team of experienced researchers, developers, practitioners and experts have blended traditional equipment with modern manufacturing principals to produce a product that performs at optimal levels.

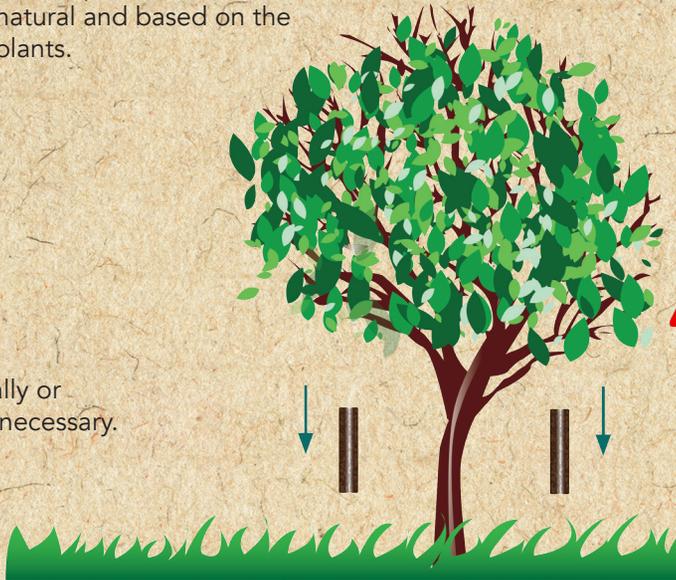

We customize every order and combine the right set of ingredients needed based on the information we have received about your site and from our testing. As part of our commitment to partnering with you, we also mandate follow up testing to ensure your site and plants are producing at optimal levels with minimal stress on natural resources.

RATES:

Brewing: Add quantities of K.A.'s Alliance™ as necessary based on the numbers you wish to achieve. One pound will approximately increase protozoa and fungi by approximately one hundred times. (Please review most recent test results on our website).

INGREDIENTS: Worm castings, thermal compost and fish byproduct, all natural and based on the needs of your plants.

Spray tea liberally or install plugs as necessary.

WARNING: This product is not for human consumption, inhalation or internal bodily use. It is not designed to store. If storage is required, contact us and refrigerate immediately. This product is sold only commercially and to only companies and individuals who are green care professionals and who have a working knowledge of handling and use. This product will not work well with landscape and agricultural synthetic products such as fertilizers and pesticides due to the living biology in our products.

Health Hazards

Swallowing:

May cause nausea and headache. Consult your physician.

Skin absorption:

No evidence of adverse effects. Consult your physician.

Inhalation:

Move to fresh air if breathing is difficult.

Skin contact:

Staining may occur. Consult your physician.

Eye contact:

Rinse with plenty of water for at least 15

minutes. Consult your physician.

Effects of Repeated

(Chronic) Overexposure:

No evidence of adverse effects from available information. Significant Laboratory Data with Possible Relevance to Human Health Hazard Evaluation: None currently known.

Preventative Measures

Respiratory Protection:

Not required if using the product outside in the fresh air. Only use protection if using during windy conditions.

Protective Gloves:

Wear loose-fitting gloves. Consult your physician.

Eye Protection:

It is recommended that goggles be worn when spraying.

First Aid

Inhalation:

Get fresh air.

Ingestion:

Dilute the stomach contents by giving large amounts of water or milk. Consult your physician.

Eyes:

Flush with water for 15 minutes. Consult your physician.

Skin:

Remove clothing and wash with soap and water. Consult your physician.

IMPORTANT: Please read product production date before proceeding. This product must be applied within 10 calendar days of production date. Soil samples need to be sent between 14th and 24th of post-production to qualify for warranty and guarantee. If not sent before the 24 day mark, all warranties are deemed null and void. This product is not for human consumption, injection, inhalation or ingestion. Due to the sensitivity and number of new human allergies, please take the necessary precautions and protection while applying or using all of our products. This product will not work well with landscape agricultural synthetic products such as fertilizers and pesticides due to the living biology in our products.

WARRANTY: If the product is applied and post application soil samples are received after 14 days, and before 24 days of shipping, customer will receive replacement of product of equal value at no charge as our commitment to you. If this product is exposed to direct sunlight and/or temperatures exceeding 80 degrees F, or temperatures below 35 degrees F, and/or not applied within correct time frame, soil samples received after deadline will void this warranty.
