

Solu-Nitrogen™ 15-0-0 Amino Acid Powder

100% Plant Based Water Soluble Nitrogen

Guaranteed Analysis

Total Nitrogen	15%
Water Soluble N	14.88%
Water Insoulble N	0.12%

Chloride <0.27% Sodium <0.09%

Plant nutrients derived from soybeans

100% soluble Solu-Nitrogen readily dissolves in water making it ideal for correcting Nitrogen deficiencies in crops, turf, trees, shrubs and ornamentals.

Solu-Nitrogen is applied as a foliar spray or to the soil through all types of irrigation systems, injectors and hydraulic sprayers.

Solu-Nitrogen has a 15% minimum of non-leachable nitrogen with little to no chloride or sodium which can build up to toxic levels in soils. Nutrient rich in 18 different Amino Acids, Solu-Nitrogen has no phytotoxic effects and is compatible with many different organic materials such as Solu-Kelp, Soluble Seaweed Powder and Solu-Mate Humic Acid Powder.

Solu-Nitrogen is best applied more often and in smaller doses once or twice per month throughout the growing season during periods of active growth. Please note that that Solu-Nitrogen is almost 100% available in its pure form.

General Application Rate: 0.5 to 2.5 pounds per acre mixed with water.

Golf Course: Greens: Apply 28 to 42 ounces per acre, Fairways: Apply 14 to 21 ounces per acre. Apply during periods of active growth.

Turf: Apply at 28 to 42 ounces per acre or 0.65 to 1 ounce per 1,000 ft². Apply during periods of active growth.

Vegetables: Apply at 1 to 5 pounds per acre depending upon soil fertility and crop requirements. Apply at 6 leaf stage, early bloom, fruit set and (optionally) 4 weeks following fruit set.

Fruit & Berries: Apply at 1 to 5 pounds per acre depending on soil fertility and crop requirements. Please visit our website for complete application guidelines for fruits, berries, grapes, stone fruits and strawberries.

Irrigation System Dilution Rates

Foliar Spray: 1: 1500-1800

Drip Irrigation: 1: 4000

Drench: 1: 4000

Hydroponic/gal. : Up to 1 tsp.

Irrigation system: 1/2 to 1lb/acre

Note: Application rates will vary due to climate, frequency, soil and reasons beyond our control. Users should conduct their own testing best suited for their crop under their conditions and environments.

Storage: Keep from moisture and humidity. Always close storage bag tightly to avoid introduction of moisture. Only mix what you will be applying.

Take Note: Eliminating all risks associated with the use of this product is not possible. Plant injury, ineffectiveness, or other unexpected results may occur due to factors beyond the control of Compostwerks LLC. The buyer exclusively assumes all such risks.
